# IETF 99 Hackathon - Integrate OpenWSN in RIOT

Tengfei Chang, Francisco Molinas, Cédric Adjih, Peter Kietzmann

## RIOT: An Open Source IoT OS

### **OpenWSN**

"The OpenWSN project serves as a repository for opensource implementations of protocol stacks based on Internet of Things standards, using a variety of hardware and software platforms".

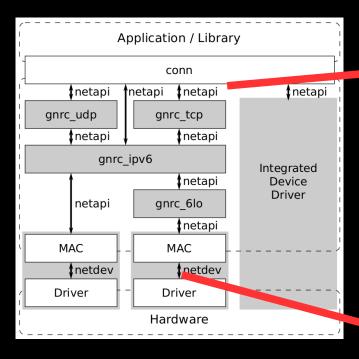

The protocol stack covers IEEE802.15.4e TSCH and 6TiSCH

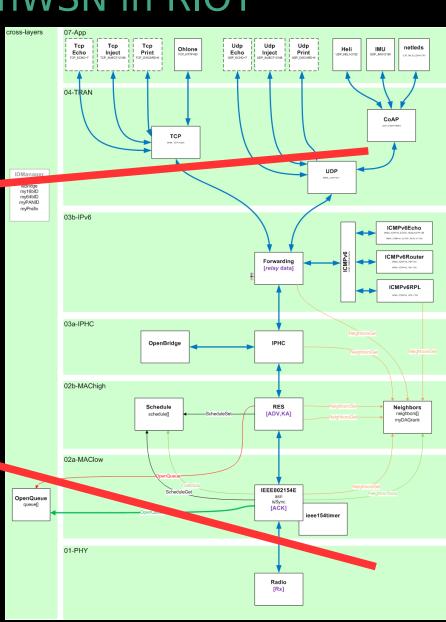

## Integration OpenWSN in RIOT

#### OpenWSN

**RIOT GNRC** 

## Porting Efforts

- Download OpenWSN as external pkg into RIOT
- Include DIRS and adapt Makefiles
- Provide southbound interface via "netdev"
  - Generic hardware abstraction
- Provide northbound interface via "sock"
  - Generic network API

Not finished yet but hopefully soon!

#### **Outline**

- Cooperation of Open Source Code/Projects RIOT, OpenWSN
- Integration of open access protocols (IPv6, 6LoWPAN, 6TiSCH, ...)
- Use of cooperative coding platforms (GitHub)
